

SACHIN KUMAR UPADHYAY

Sr. Software Engineer

usachin3@gmail.com | +91-7084306252 ,8130709455 | Varanasi, Uttar Pradesh

CAREER OBJECTIVE

A software engineering graduate seeking to work in a fun and challenging environment that encourages continuous learning and skill development, while contributing to the growth of the organization through dedicated software engineering work.

SUMMARY

- Having **6.5+ years** of IT experience in developing and designing web applications using **ASP.NET MVC, ASP.NET CORE, Web API, Angular, C#, MS SQL**.
- Strong knowledge of Object Oriented Programming (OOP) concepts.
- Successful working both independently and in a team environment.
- Driven to make a positive impact on projects and consistently meet or exceed expectations.
- Good analytical, programming, troubleshooting and debugging skills.
- Good communication skills.

SKILL HIGHLIGHTS

Programming Languages	C#, C
Web Technologies	ASP.NET MVC, ASP.NET CORE, ASP.NET Web Forms, HTML, CSS
Scripting Languages	JavaScript, jQuery, Angular
Service Oriented Arch.	Web API, Web Services, ASP.NET Core
Databases	SQL Server, MySQL
Data Access Technologies	ADO.NET, LINQ, Entity Framework
Development Tools	Visual Studio 2019, 2022
Operating Systems	MS-DOS, Windows 2008 / 2010 / 2011

WORK EXPERIENCE

- **Sr. Software Developer, Varuna Integrated Logistics** — Jan 2026 to Till Date
- **Sr. Software Developer, Clover Info-tech** — Mar 2024 to Oct 2025
- **Software Developer, Mascot Soft-web Solutions** — May 2020 to Mar 2025

PROJECT DETAILS

Project 1: University Automation (Online Form Submission)

Client	Chaudhary Charan Singh University (Meerut)
Environment	C#, ASP.NET Core, ASP.NET MVC, SQL Server, JQuery, JavaScript, Web API
Role	.Net Developer

Duration	2019 – 2022
-----------------	-------------

Description: University Automation (Online Form Submission) is used for submitting Admission Forms and Exam Forms, and for generating Enrollment Numbers, Centre allocation, and various types of reports required by the university.

Responsibilities:

- Responsible for analysis, design, implementation and deployment of code.
- Worked on development and maintenance of the application.
- Worked on fixing bugs reported by users and handling enhancements suggested by the client.
- Followed Three Tier Architecture.

Project 2: University Automation (Online Form Submission)

Client	Mahatma Gandhi Kashi Vidyapith
Environment	C#, ASP.NET Core, Web API, SQL Server, Angular
Role	Net Developer
Duration	2022 – 2025

Description: University Automation (Online Form Submission) is used for submitting Admission Forms and Exam Forms, and for generating Enrollment Numbers, Centre allocation, and various types of reports required by the university.

Responsibilities:

- Worked closely with Business Analysts and development teams to understand client requirements.
- Designed the UI.
- Extensively used ASP.NET Core, C#, jQuery, Ajax and Angular.
- Designed form validations using JavaScript.
- Followed Three Tier Architecture.

Project 3: Unified Payment Processing System

Client	HDFC (Bank)
Environment	C#, Entity Framework, SQL Server, .NET Core, jQuery, Angular
Role	Sr. Net Developer
Duration	Mar 2025 to Till Date

Description: Designed and implemented an automated scheduler within a Unified Payment Processing System to fetch unread emails, parse and extract attachments, and securely store data in the database as well as on an SFTP server, ensuring seamless integration and reducing manual effort.

Responsibilities:

- Developed in .NET Core, Web API using C#.
- Developed stored procedures in SQL.
- Followed Three Tier Architecture.

Project 4: Truck Hire Management System

Client	Varuna Integrated Logistics
Environment	C#, ASP.NET Core, Web API, SQL Server, WhatsApp Business API
Role	Sr. Net Developer

Duration	Jan 2026 to Till Date
----------	-----------------------

Description: Worked on the Truck Hire module of a logistics management system, developing Web APIs to send automated WhatsApp notifications for Advance Truck Hire and Balance Truck Hire, keeping transporters and internal teams updated on hire status and payments in real time.

Responsibilities:

- Developed Web API for sending WhatsApp notifications for Advance Truck Hire.
- Developed Web API for sending WhatsApp notifications for Balance Truck Hire.
- Integrated WhatsApp Business API for automated real-time messaging.
- Worked on database design and stored procedures in SQL Server.
- Followed Clean Architecture.

Project 5: PAD Generation System

Client	Varuna Integrated Logistics
Environment	C#, ASP.NET MVC, Web API, SQL Server
Role	Sr. Net Developer
Duration	Jan 2026 to Till Date

Description: Worked on a PAD Generation system built on ASP.NET MVC, covering the Bill Cover Page module and the PRQ Approval module, and developed the complete set of Web APIs required for both modules.

Responsibilities:

- Worked on the PAD Generation module built in ASP.NET MVC and developed all related API.
- Developed API for the Bill Cover Page module.
- Developed API for the PRQ Approval module.
- Involved in requirement analysis, API design and implementation.
- Followed Three Tier Architecture.

PERSONAL DETAILS

Date of Birth	07 January 1991
Gender	Male
Birth Place	Varanasi, UP
Father's Name	Shitala Prasad Upadhyay
Nationality	Indian
Marital Status	Married
Languages Known	English, Hindi
Hobbies	Watching Movies, Playing Games, Traveling, Programming

DECLARATION

I hereby declare that the above information is true and correct to the best of my knowledge. I bear the responsibility for the correctness of the mentioned particulars.
