PROJECTS

StayEase - Property Rental Platform | *Node.js, Express.js, MongoDB, EJS* | [Live](#) | [GitHub](#)

Built and deployed a full-stack property rental platform with secure signup, login and logout using Passport.js, bcrypt and session-based authentication.

Designed MongoDB schemas and RESTful routes supporting authenticated CRUD operations for villas, flats and apartment listings.

Created a responsive property-discovery interface with category-based filtering and reusable layout components.

WeatherScope - Weather Forecast Application | *React.js, Material UI, OpenWeatherMap API* | [Live](#) | [GitHub](#)

Built a responsive React application using reusable components, controlled inputs and asynchronous API requests.

Handled invalid city searches, loading states and API failures, and secured the API key through environment variables during Vercel deployment.

REST Countries Explorer | *HTML5, CSS3, JavaScript, REST API* | [GitHub](#)

Integrated the REST Countries API to render data for 250+ countries with search and region-based filtering.

Designed a responsive interface for mobile, tablet and desktop using CSS Flexbox and Grid without external frameworks.
