

SURAJ HALDAR

Full-Stack Web Developer

7078956123 | haldarsuraj769@gmail.com | Haldwani, Uttarakhand | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFILE SUMMARY

Full-stack web developer working on a live, multi-school exam management system. Experienced across the stack — from database schema design and backend logic to building proctored testing interfaces and PDF paper generation. Able to debug issues, rebuild modules, and deliver working features in a fast-paced environment. Bachelor of Computer Applications (BCA), 2026.

WORK EXPERIENCE

Associate Software Engineer Intern | JSI Software Solutions

March 2025 – Present

Module Developer — Abhyas A.I. Exam Portal

- Working on a PHP/MySQL school exam management system used by multiple schools, with role-based access for Admin, Teacher, and Student users.
- Designed and built a Question Bank module with a CBSE-pattern paper generator, including a searchable multi-select filtering UI (Academic Year, Chapter, Difficulty) and smart cross-filtering logic in JavaScript.
- Built a custom PDF generation workflow to match official CBSE Class 10 exam paper formatting — handling multi-section layouts, repeating headers, and dynamic Assertion-Reason / internal-choice question types.
- Rebuilt the Computer-Based Testing (CBT) module (11+ files): diagnosed and fixed a database bug that was breaking exam submissions, and built a proctored exam interface with violation tracking (tab-switch, fullscreen exit, dev-tools access).
- Added CSV result export, school-scoped access control, and a public result-lookup page; ran a full database cleanup/migration to reset the system for production rollout.
- Imported and structured a 1,600+ question CBSE Class 10 Science question bank with corrected chapter-wise SQL mapping.
- Live sandbox environment: [sandbox-abhyas.jsissoftwaresolutions.in](#)

Careers & Verification Portal — JSI Software Solutions

- Designed and developed the company's official careers portal ([career.jsissoftwaresolutions.in](#)) end-to-end — job listings, online application flow, HR candidate review workflow, and candidate login system.
- Built a certificate verification system ([verify_certificate.php](#)) and an Employee E-Verification Portal ([employee_verification.php](#)) with Employee ID/mobile search, OTP-based email verification, and audit logging.

ADDITIONAL PROJECTS

- E-Commerce Website (Personal Project): Product listings, cart, and checkout flow. Built with HTML, CSS, JavaScript, PHP, MySQL.
- Digital Banking Dashboard (Personal Project): Secure login, transaction history, printable statements, and transfer flow. Built with HTML, CSS, JavaScript, PHP, MySQL.
- Browser Games (JavaScript): Rock-Paper-Scissors and Tic-Tac-Toe with vanilla JavaScript — game logic, score tracking, responsive UI.
- Personal Portfolio Website ([suraj0.netlify.app](#)): Personal portfolio showcasing projects and tech stack. Built with HTML, CSS, JavaScript, React.js.

TECHNICAL SKILLS

Backend: PHP, MySQL, RESTful APIs, Role-Based Access Control

Frontend: HTML, CSS, JavaScript, React.js, Responsive UI/UX, WordPress

Programming: C, C++, JavaScript

Tools & Practices: Git, VS Code, Visual Studio, PDF generation (custom + TCPDF), CSV/Excel bulk import, DB migration & collation debugging

Concepts: Artificial Intelligence & Machine Learning fundamentals, Cloud Computing overview

Currently Learning: *Next.js, Tailwind CSS, Bootstrap*

EDUCATION

Bachelor of Computer Applications (BCA) — MIET Kumaon

Expected Graduation: 2026

- Key Courses: Web Development, Artificial Intelligence, Software Engineering, APIs, Cloud Basics

CERTIFICATIONS

- Infosys Springboard — HTML5: The Language (March 2025)
- Infosys Springboard — CSS3 (March 2025)
- Infosys Springboard — JavaScript (March 2025)
