Professional Summary

Performance-driven Frontend Developer with 2 years of experience specializing in building highly scalable web applications, responsive user interfaces, and complex administrative systems. Deep understanding of full-stack workflows, allowing for seamless end-to-end RESTful API integration and efficient data layer management. Expert in global state management, client-side caching strategies, and transforming complex regional and international client requirements into high-performance digital products.

Technical Skills

- **Frontend Frameworks:** React.js, Next.js, Zustand, Context API, HTML5, CSS3, JavaScript (ES6+)
- **UI Layouts & Styling:** Tailwind CSS, Responsive Web Design, Glassmorphic Aesthetics, Animations
- **Core Competencies:** API Integration, Global State Management, Centralized Dashboards, E-commerce Flows
- **Tools & Version Control:** Git, GitHub, Postman, Vite, Webpack

Professional Experience

Frontend Developer

May 2024 – Present

Venture Consultancy Services

Lucknow, India

- Design, develop, and maintain dynamic enterprise web applications using React.js and Next.js, boosting Core Web Vitals (LCP, CLS) performance benchmarks by over **35%**.
- Architected secure, centralized admin panels handling over **1,200+** concurrent data bindings, deploying programmatic ticket routing workflows that cut response times by **40%**.
- Collaborate closely with backend engineers using database schema insights to map, consume, and resolve customized RESTful API bugs, reducing integration cycles by **25%**.

Key Projects

Wild Northern Journey (Canada Tourism Platform) | *React.js, Tailwind CSS, REST APIs, Context API*

- Architected the entire frontend interface for a premium Canadian travel and shuttle service platform based out of Banff.
- Engineered fluid, responsive booking funnel modules for 4 core service verticals: **Shared Tours, Private Tours, Multi-day Tours**, and **Private Transfers**.
- Integrated third-party booking APIs and reservation structures, smoothly coordinating live multi-currency conversions and self-executing pricing configurations.
- Accelerated load speeds by leveraging modern asynchronous workflows and streamlined asset-delivery strategies, keeping bounce rates under **15%**.

NSAMPARC (National Government Quarter Management System) | *React.js, Context API, REST APIs, Tailwind CSS*

- Developed a secure, scalable, and centralized **Government Admin Panel** from scratch to manage national estate allocations and real-time public resource logging.
- Designed high-throughput dashboards for **Visitor Management** and **Plot Allocation Management**, handling hundreds of instant daily logs securely.
- Programmed an intelligent **Ticket Assignment System** with distinct UI workspaces, routing tasks automatically to Electrical, Civil, and General Administrators with **100%** accuracy.

Astrobbharat AI (National Astrology Platform) | *Next.js, Redux Toolkit, Tailwind CSS*

astrobbharatai.com

- Engineered the consumer-facing interface and the robust **Digital Mart** (E-commerce) framework for a high-traffic regional platform.
- Streamlined custom API workflows for massive product grids, deep multi-level categories, and complex dynamic filtering mechanisms.
- Implemented reliable client-side synchronization using Redux Toolkit to run an uninterrupted multi-page **Global Cart Functionality** across complex user paths.

Education

Master of Computer Applications (MCA)

IFTM University

2025 – Present

Moradabad, India — *Status: Pursuing*

Bachelor of Computer Applications (BCA)

Mahatma Jyotibha Phule Rohilkhand University

2021 – 2024

Bareilly, India
