

UTKARSH SRIVASTAVA

Assistant System Engineer

Systems & Automation Testing Support | Linux Infrastructure | Storage Operations (NetApp ONTAP)

Usrivastava550@gmail.com • +91-6307703246 • linkedin.com/in/utkarsh-srivastava-35baa7366 • Lucknow, India

PROFESSIONAL SUMMARY

Systems & Automation Testing professional with 3+ years at Tata Consultancy Services, supporting a NetApp ONTAP storage environment in an Agile delivery model. Performs automation testing of storage jobs and releases — configuring and monitoring scheduled test/regression runs in Jenkins, updating existing automation scripts as required, and managing test cycles (up to 50 cases per cycle) in qTest. Skilled in Linux-based log investigation, incident diagnosis, and JIRA-based defect lifecycle management, with cross-team coordination to drive issues to resolution.

SKILLS

NetApp ONTAP, Linux/Unix (PuTTY), JIRA, Jenkins, qTest, Python (Pytest — test function/assertion editing), AWS (Basics — EC2, S3), MySQL/SQL, ServiceNow, Confluence, Shell scripting (basic), Agile/Scrum.

WORK EXPERIENCE

Tata Consultancy Services (TCS) — Assistant System Engineer

Lucknow, India | Aug 2022 – Sep 2025

- Performed automation testing and root cause analysis for a NetApp ONTAP storage environment — validating scheduled updates/performance runs and investigating logs via PuTTY to isolate hardware/node issues from script-level defects.
- Updated and adapted existing automation scripts as directed to keep test coverage aligned with evolving requirements.
- Configured and monitored scheduled test/regression jobs in Jenkins, and managed up to 50 test cases per cycle in qTest across release phases.
- Ran regression validation after storage system updates to confirm existing functionality remained intact before production handoff.
- Raised and tracked defect tickets in JIRA with detailed log evidence and reproduction context, driving issues through to resolution with developer teams.
- Served as the primary technical liaison between storage operations and developer teams, translating log findings into clear, actionable issue reports.
- Supported full release-cycle phases for NetApp ONTAP — planning, execution, regression validation, and post-release monitoring.
- Participated in Agile/Scrum ceremonies (sprint planning, stand-ups, retrospectives) and maintained documentation to support team knowledge continuity.

PROJECTS

PulseLine – Hospital Management System — Academic Project

Nov 2021 – Mar 2022

- Built a web-based hospital management system (patient registration, appointment booking, doctor consultations) with a PHP/MySQL backend and HTML5/CSS3/Bootstrap frontend.

CERTIFICATIONS

- Data Analyst Foundation Course — Udemy (2026)
- Project Management Foundations — LinkedIn Learning (2020)
- SEO Foundations — LinkedIn Learning (2020)
- PHP Certification — SOFTPRO Technologies, Lucknow (2019)

EDUCATION

Master of Computer Application (MCA) — IMS Ghaziabad, 2022

Bachelor of Computer Application (BCA) — Sacred Heart Degree College, 2020
