SUMMARY

MIS Executive | MIS Analyst with experience in MIS reporting, dashboard automation, and business intelligence using Excel, SQL, and Power BI. Skilled in data consolidation, report automation, and business performance tracking to support management decision-making. Proficient in database management, data visualization, and process optimization for accurate, timely business reporting.

EDUCATION

Bachelor of Computer Science, Galgotias University, Greater Noida (2023-2026)

Diploma (3 Years), Government Polytechnic College, Meerut (2020-2023)

Schooling, DDPS Bijnor (2007-2020)

SKILLS

Technical Skills: MIS Reporting, Business Intelligence, SQL Database Management.

Languages: SQL, Python, HTML-5, CSS

Databases: MySQL, Postgresql

Visualization & BI Tools: MS Excel ,Power BI,Google Sheets, Cisco Networking, Data Virtualization.

Libraries: Pandas ,NumPy.

Soft Skills: Problem-Solving, Communication, Time Management, Attention to Detail, Adaptability

EXPERIENCE

MIS Executive (In Spslabs) (Feb 2026 – Present)

- Prepared and maintained daily, weekly, and monthly MIS reports for sales, leads, and business performance using Microsoft Excel and SQL.
- Developed interactive dashboards in Excel and Power BI to track KPIs, monitor trends, and support data-driven decision-making.
- Collaborated with sales and operations teams to analyze lead conversion, monitor performance metrics, and provide actionable business insights.
- Managed data collection, validation, and cleaning to ensure accurate reporting while automating repetitive reporting tasks using Python and Excel.

PROJECTS

MIS Dashboard – Sales & Inventory Tracker:

Automated MIS report dashboard tracking daily sales, inventory levels, and key performance indicators (KPIs) across multiple product categories. Built dynamic Excel pivot tables with conditional formatting to highlight anomalies and trends in real-time. Utilized Python (Pandas, NumPy) to automate data cleaning from raw CSV exports, reducing manual effort by 70%. Generated weekly summary reports with month-on-month growth analysis and stock turnover metrics.

Website Traffic Analysis – Python

Developed a Python-based website traffic analysis project to process and analyze user visit data using Pandas. Performed data cleaning, exploratory data analysis (EDA), and identified key traffic patterns and user behavior. Created insightful visualizations to monitor visitor trends, traffic sources, and engagement metrics. Leveraged Python libraries such as Pandas, Matplotlib, and Seaborn to generate actionable business insights from web traffic data.
