PROFESSIONAL SUMMARY

Quality Analyst with 1 year of experience in Manual Testing, Automation Testing, and API Testing. Experienced in validating eCommerce platforms, payment gateway integrations, and addon-based solutions. Hands-on expertise in Playwright automation using JavaScript, API validation using Postman, Docker-based execution, and CI/CD pipeline workflow validation.

TECHNICAL SKILLS

Testing: Manual Testing, Automation Testing, API Testing, Functional Testing, Regression Testing, Smoke Testing, Integration Testing, End-to-End Testing

Automation: Playwright, Maestro

Tools: Postman, GitLab, Docker, CI/CD

Languages: JavaScript, SQL, C++

Platforms: CS-Cart, OpenCart, Web Applications

PROFESSIONAL EXPERIENCE

Webkul Software Pvt. Ltd.

May 2025 – Present

Quality Analyst

- Performed end-to-end testing of web applications, addons, payment integrations, and customer workflows based on business requirements.
- Designed and executed manual test scenarios for functional, regression, smoke, and integration testing.
- Created Playwright automation scripts for repetitive and business-critical workflows to reduce manual testing efforts.
- Executed automation scripts in CI/CD environments and analyzed execution failures, logs, and debugging information.
- Worked closely with developers to identify, verify, reproduce, and resolve defects efficiently.
- Prepared user guides, validated release builds, and delivered live demos for customers.

PROJECTS

CS-Cart POS Addon

Worked on CS-Cart Point of Sale (POS) solution used to manage both online and physical store sales simultaneously. Tested complete end-to-end workflows including product billing, order management, checkout process, inventory synchronization, and payment scenarios. Designed multiple test scenarios and automated important workflows using Playwright. Identified defects, collaborated with developers for issue resolution, created product user guides, and supported customer live demos.

Stripe Payment Gateway Extension

Tested Stripe payment gateway integration for CS-Cart stores with multiple payment methods and transaction workflows. Validated positive and negative payment scenarios, payment failures, transaction validation, and checkout behavior. Designed test cases and automated payment flows to ensure smooth payment processing and regression coverage.

Auction Addon

Tested auction business workflows including increment bidding, automatic bidding, reserve bidding, auction lifecycle, and winner selection scenarios. Validated product logic, bidding rules, customer workflows, and collaborated with developers to understand requirements and resolve functional issues.

CS-Cart Wallet System Extension

Worked on wallet system extension supporting wallet recharge, refund management, money transfer, partial wallet payments, and checkout wallet usage. Tested end-to-end wallet operations, refund-to-wallet scenarios, transaction flows, and analyzed automation possibilities for complete workflow coverage.

HIGHLIGHTS

Strong understanding of SDLC, STLC, Defect Life Cycle, requirement analysis, bug reporting, and release validation. Experienced in working with addon-based products, eCommerce workflows, and payment integrations.
