SUMMARY

Detail-oriented Java Developer with 3 years of hands-on experience in building high-performance applications and enhancing existing systems. Proficient in managing end-to-end project lifecycles and translating business requirements into effective, scalable solutions. Experienced in working within agile teams and adapting quickly to evolving requirements. Recognized for strong analytical thinking, problem-solving abilities, and consistently delivering reliable results on time. Committed to producing clean, maintainable code and contributing positively to team productivity and overall project success.

KEY SKILLS

- Core Java & Language Proficiency
- Frameworks & Backend Development
- Database & Persistence
- API & Integration
- Testing & Quality Assurance
- Performance & Scalability
- Logging, Monitoring & Support
- Testing & Quality Assurance
- Security & Authentication
- Software Development Methodologies

TECHNICAL SKILLS

Backend Technologies: Java, Spring Framework, Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, Microservices.

Frontend Technologies: HTML5, CSS, JavaScript, TypeScript, Angular.

Databases: MySQL, PostgreSQL, MongoDB, Oracle SQL.

Tools & Servers: Apache Tomcat, Maven, IntelliJ IDEA, Eclipse, Visual Studio Code, MySQL Workbench, pgAdmin, MongoDB Compass.

Version Control Systems: Git, GitHub, GitLab, Git Bash.

PROFESSIONAL EXPERIENCE

Java Developer

Sep '25 - Present

Sileo Technology Private Limited

Lucknow, IN

- Enhanced backend modules using Java through comprehensive analysis of business requirements, achieving a 30% reduction in API response times & significantly elevating overall system efficiency
- Implemented RESTful services and integrated them with relational databases, ensuring seamless data flow and enhancing application reliability by 25% across critical workflows.
- Refined the existing codebase through refactoring and performance tuning, lowering system errors by 40% and significantly improving production stability.
- Collaborated with cross-functional teams to troubleshoot high-priority defects, resulting in a 35% reduction in turnaround time for issue resolution and smoother release cycles.
- Accelerated deployment & testing processes within the SDLC by 25%, significantly boosting team productivity & enhancing release confidence

Java FullStack Developer

Oct '21 - Aug '23

Mastek Limited

Gurgaon, IN

- Improved end-to-end application modules by translating client requirements into functional components, resulting in a 30% increase in feature delivery speed and enhanced customer satisfaction.
- Revamped legacy Java applications through structured refactoring and modernization efforts, boosting system performance by 40% and reducing maintenance overhead.
- Integrated frontend interfaces with backend APIs using consistent coding standards, improving usability and reducing user-reported issues by 25% across releases.
- Resolved early production defects by engaging with development, support, & testing teams throughout the SDLC, achieving a 35% reduction in production incidents
- Streamlined build and deployment workflows by coordinating with DevOps teams, leading to 20% faster release cycles and more predictable delivery timelines.

EDUCATION

Post Graduate Diploma in Software Development (Full Stack)

Mar '24 - May '25

IIIT Bangalore & upGrad

Bengaluru, IN

CERTIFICATIONS

- Core Java Certification | UpGrad
- Graduate LEAP Program Certification | Mastek
- Associate Integration Developer Certification | Dell Boomi

KEY DEVELOPMENT PROJECTS

- **UDSP**-Developed a scalable Unified Disease Surveillance Platform using Java, Spring Boot, Microservices, Angular, and PostgreSQL, incorporating secure authentication and advanced role-based access control across Facility, Lab, and Surveillance modules.
- Enabled seamless workflows for Facility, Lab, and Surveillance authorities (SSO, DSO, Super Admin), improving real-time disease reporting, data accuracy, and overall decision-making efficiency.
- **E-Commerce Web Application**-Developed end-to-end e-commerce applications using Java, Spring Boot, Microservices, Hibernate/JPA, and Angular/React, implementing secure user authentication, role-based access control, and payment gateway integrations (Stripe/Razorpay) within a modular microservices architecture.
- Optimized database queries and backend workflows to enhance performance, improving API response times by 30% while delivering scalable, responsive user interfaces and seamless cross-platform user experiences.
