ACADEMIC DETAILS

B Tech (Computer Science & Engineering)	2023-2026	MMMUT, Gorakhpur	8.69 / 10.0
Diploma (Computer Science & Engineering)	2020-2023	Government Polytechnic, Premdhar Patti, Pratapgarh	82.08%
Class X (CBSE)	2020	B Indian Public School, Sultanpur	84.8%

INTERNSHIP/EXPERIENCE

Summer Internship Trainee

Softpro India Computer Technologies Pvt. Ltd., Lucknow

July 2022 - Aug 2022

- **Project Link:** <https://github.com/vishaltiwari012/Online-Job-Portal---Django>
- Developed a web-based Online Job Portal using Python Django to understand backend web application development.
- Implemented features for job posting, job application, resume upload, profile update, and password management.
- Built role-based access for employers, job seekers, and admin users.
- Designed an admin dashboard to manage users and publish notices on the application homepage.

SKILLS

Technical: Java, SQL, HTML, CSS, JavaScript, React.js, Spring Boot, REST APIs, PostgreSQL, MongoDB, Git, Docker, Postman

Curriculum: Data Structures & Algorithms, Object-Oriented Programming, Database Management System

Certificates: 0 to 100 Spring Boot | Coding Shuttle

Interests: Backend Development, Microservices, Cloud Computing

PROJECTS

SocialPulse

- **Project Link:** <https://github.com/vishaltiwari012/instagram-backend>
- Developed a scalable social media backend to understand real-world backend system design and feature integration.
- Implemented core features like posts, comments, likes, profiles, follows, and account privacy controls.
- Secured user authentication using JWT, refresh tokens, OTP-based verification.
- Built 1:1 chat and real-time notifications using WebSocket with offline message storage.
- **Tech Stack:** Spring Boot, PostgreSQL, Spring Security, WebSocket, Docker, GitHub Actions

TastyBite

- **Project Link:** <https://github.com/vishaltiwari012/TastyBite>
- Built a full-stack food ordering application to learn end-to-end application development.
- Implemented user authentication, food listing, cart management, and admin food operations.
- Used AWS S3 for efficient food image storage and media handling.
- Integrated online payment flow in test mode and order tracking across user sessions.
- **Tech Stack:** Spring Boot, MongoDB, Spring Security, React.js, Bootstrap

LinkUp

- **Project Link:** <https://github.com/vishaltiwari012/LinkUp>
- Designed and developed a microservices-based backend application to understand scalable and distributed system architecture.
- Used PostgreSQL for structured user data and Neo4j to model and manage dynamic user relationships using a graph.
- Explored asynchronous microservice communication using Apache Kafka to understand event-driven architecture basics.
- Designed a user onboarding flow where services communicate via events to reduce tight coupling.
- **Tech Stack:** Spring Boot, PostgreSQL, Neo4j, Apache Kafka, Docker, Spring Security

ACHIEVEMENTS

- Achieved 4-star rating in C programming on HackerRank, demonstrating strong coding fundamentals.
- Qualified GATE 2026 (Computer Science & Engineering).
