Summary

Android and React Native Developer with hands-on experience in building and deploying scalable mobile applications using React Native, Firebase, REST APIs, and modern UI development practices. Experienced in developing production-level applications with authentication systems, real-time features, and Play Store deployment. Passionate about building impactful software products and continuously learning modern technologies.

Technical Skills

Languages: JavaScript, TypeScript, C++, Python

Frontend: React.js, HTML, CSS

Mobile: React Native, Android Development

Backend: Node.js, Express.js, REST APIs

Databases: Firebase, MySQL

Tools: Git, GitHub, Postman, VS Code, Android Studio

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems

Education

Shri Ramswaroop Memorial University, Lucknow

2022 – 2026

Bachelor of Technology – Computer Science and Engineering

CGPA: 8.28

Projects

BolYaar – Social Platform for Thoughts & Quotes (Play Store — Beta)

- Developed and deployed a React Native mobile application for creating and sharing thoughts, quotes, and status posts.
- Integrated Firebase Authentication, Firestore Database, and real-time content management features.
- Designed modern and interactive UI with multilingual support and content editing functionality.
- Managed Play Store deployment and ad integration for production release.

Jinete – Student Ride Sharing Application

- Built a ride-sharing mobile application focused on student transportation and smart commute management.
- Developed responsive user interfaces and integrated real-time functionality for enhanced user experience.
- Implemented authentication systems and backend API connectivity for scalable application performance.

Crop Identification System (YOLO)

- Developed a machine learning model using YOLO for crop detection from satellite images.
- Improved model accuracy through preprocessing and optimization techniques.

Experience

Android Developer Intern – SlotinSolutions

June 2025 – Present

- Developing and maintaining mobile applications using React Native with responsive and scalable UI components.
- Integrating REST APIs, Firebase services, and authentication systems for production-ready applications.
- Building reusable components and optimizing application performance for better user experience.
- Collaborating with development teams in an Agile environment to deliver high-quality features.

Certifications

GFG 160 Days of Problem Solving – GeeksforGeeks

AI for Beginners – HP LIFE (2025)
