## Summary

---

Backend Developer with 2.5+ years of experience building scalable healthcare and enterprise applications using Node.js, NestJS, PostgreSQL, AWS and Microservices. Delivered multiple production-grade platforms including Pharmacy, Lab Test, Homecare, Doctor Consultation, Rider Logistics and Healthcare Lead Management systems. Experienced in distributed systems, API architecture, database optimization, payment integrations and cloud-native development with proven impact on performance, automation and operational efficiency.

## Experience

---

### Software Developer (SDE-2)

Apr 2025 – Present

#### Mediversal Health Care Pvt. Ltd.

Patna, India

- Led backend development of Mediversal247 healthcare ecosystem including Pharmacy, Lab Test, Homecare and Doctor Consultation platforms serving 5,000+ users.
- Architected and deployed 10+ scalable microservices using Node.js, NestJS, PostgreSQL and AWS supporting healthcare operations across multiple business units.
- Designed end-to-end Order Management System integrating Cart, Prescription Management, Coupon Engine, Razorpay Payments, Shiprocket and Local Rider logistics, reducing processing time by 45%.
- Developed Pharmacy platform covering Product Catalog, Inventory Management, Prescription Validation, Order Lifecycle and Delivery Partner Assignment workflows.
- Built Homecare and Lab Test platforms supporting Services, Procedures, Health Packages, Home Collection, Hospital Collection, Report Management and Booking workflows.
- Engineered Doctor Consultation platform with Hospital Management, Doctor Onboarding, Slot Management, Online/Offline Appointments and Consultation Booking systems.
- Developed Mediversal Rider App APIs enabling order assignment, real-time delivery tracking, customer location visibility and delivery workflow automation.
- Engineered Mediversal Simran healthcare lead-generation platform supporting Doctor Consultations, Healthcare Services, Surgical Procedures, Health Packages and Insurance Tie-up programs.
- Built admin-driven CMS modules for Services, Procedures, Insurance Tie-ups, Health Packages and Doctor-authored Medical Blogs, enabling rapid content management and customer engagement.
- Optimized PostgreSQL schema design, indexing strategies and API performance achieving 30–40% faster response times while reducing database load.

### Software Developer (SDE-1)

Dec 2023 – Apr 2025

#### Meril Life Sciences Pvt. Ltd.

Vapi, India

- Developed QR Code and Dynamic Link Management Platform tracking 5,000+ medical devices using Django, PostgreSQL and Next.js.
- Built automated Excel/CSV Import and SAP Integration pipelines reducing manual operations by 70%.
- Implemented caching and database optimization strategies improving retrieval performance by 40%.
- Developed healthcare learning, awareness and vendor management platforms using Next.js and Frappe Framework.
- Delivered responsive frontend applications improving page load performance by 35%.

## Technical Skills

---

**Languages:** JavaScript, TypeScript, SQL, Python

**Backend:** Node.js, NestJS, Express.js, Django, REST APIs, Microservices

**Frontend:** React.js, Next.js, Tailwind css, Shadcn

**Databases:** PostgreSQL, MySQL, Redis, Turso

**Cloud & DevOps:** AWS (EC2, Lambda, S3, RDS, Cognito, CloudWatch), Docker, GitHub Actions, CI/CD, Linux

**Architecture:** Microservices, System Design, API Design, Distributed Systems, Event-Driven Architecture, Database Optimization

**Integrations:** Razorpay, Shiprocket, WhatsApp Business API

**Tools:** Git, GitHub, Postman, VS Code, Figma and AI tools

## Education

---

### Master of Computer Applications (MCA)

MMUT Gorakhpur India

2021 – 2023

CGPA: 7.4/10

## Certifications

---

- Object-Oriented Programming (OOP) – Coding Ninjas
- Web Development Design – Vision InfoTech
- Roadmap to Career in Cloud Computing – Quik Skills
- Python Programming – Infosys Springboard
- Active competitive programming profiles: GeeksforGeeks, HackerRank, Code Studio
